

## From WaterSense®

Dear WaterSense partner,

Do you have a water-efficient landscape you'd like WaterSense to showcase? If so, WaterSense is writing to remind you to submit your photographs to the WaterSense Landscape Photo Gallery.

The Gallery will display photographs of water-efficient landscapes from across the country to give homeowners and new home builders water-saving design ideas. Photographs of landscapes meeting basic water-efficiency criteria will be displayed along with the name of the designer, submitting organization, or homeowner. Submissions by homeowners, landscaping companies, nonprofit organizations, municipalities, and more are encouraged so please feel free to forward this announcement to other interested parties!

Take advantage of this great opportunity to exhibit your skills in water-efficient landscape design while helping WaterSense demonstrate to the public that landscapes can be both beautiful AND water-efficient. Visit the Call for Landscape Photos page on the [WaterSense website](#) for complete submission instructions.

In addition to submitting a photo, please be sure to complete the online submission form and the WaterSense water budget tool to provide helpful details about the water-efficient aspects of your landscape. All photographs must be received by September 30, 2010, for the gallery launch. Pictures should be submitted as .jpg images no smaller than 100KB and no larger than 1 MB. Please be sure to include your name or the name of your organization with your submission.

Do you like this campaign idea and want to help? Post the WaterSense Web badge to your Web site. The Web badge, featured above, is a clickable image that promotes and links to the Call for Landscape Photos. See the [WaterSense website](#) for additional details on how to post the badge to your site.

Feel free to contact the WaterSense Helpline at (866) 987-7367 or [watersense@epa.gov](mailto:watersense@epa.gov) with any questions.

Regards,  
EPA's WaterSense Team
